EDUCATION

RMIT University

Bachelor of Engineering, Software Engineering

Ho Chi Minh City

Expected Graduation, May 2028

- **Focus:** Full-Stack Web Development
- **Related coursework:** Advanced Java Programming, Software Engineering Design, Practical Database Concepts, Algorithms and Data Structure, Fullstack Development.

PROJECTS

Motul EPR Compliance Platform

Backend Developer

Remote

Sep 2026 - Present

- Develop **REST APIs and business rules** for a platform digitizing Motul's used-oil EPR workflow, tracking waste-oil collection from waste owners to recyclers for **100+ registered accounts**.
- Built the **password reset flow** by integrating **Supabase Auth** email links (1-hour hashed tokens) into the Express/TypeScript API, with Zod input validation.
- Resolve teammate-reported backend issues, currently **adding pagination and search** to batch collection records so recyclers no longer load every record on one page.

Affordable Food Federation - [Live Demo](#)

Full Stack Developer

RMIT University

Jul 2026 - Sep 2026

- Owned **authentication, profiles, payments, and middleware** for a food-donation platform connecting donors with recipients to reduce food waste, built by a **4-person team** with React, Node.js, and MongoDB.
- Secured **19 REST endpoints** across 3 roles with JWT in httpOnly cookies, role-based middleware, token revocation, and login logout.
- Built **Stripe and wallet payments** for a premium preference-alert tier, using atomic MongoDB transactions and an **idempotent** webhook to prevent double charges.

ACTIVITIES AND LEADERSHIP

NEO Culture Tech Club

Head of Technology

RMIT University

Jun 2026 - Present

- Build [NCT Hub](#), the club's Next.js website where 50+ members showcase the club, record achievements, and access in-house tools and projects.
- Coordinated **10+ software projects** across 11 teams in **2 months**, shipping 100% on time through weekly progress meetings.
- Organize a university-wide tech contest for **70+ expected participants** from 4 majors, with **10+ organizers** recruited so far.

SKILLS

Languages & Databases: TypeScript, JavaScript, Python, Java, C++, PostgreSQL, MongoDB.

Frameworks & Libraries: Node.js, Express.js, React.js, Next.js, Prisma, Zod.

Tools & Services: Git, GitHub, Docker, Postman, Stripe, Cloudinary, Resend, Render, Vercel, Supabase.
